## ABOUT US

# Viñas en Flor

*“We are women and men who travelled thousands of kilometers listening, learning, observing and capitalizing on all kinds of experiences with those who know most. We brought them to Cafayate Valley and mixed them with our mountains, our vineyards, and our culture.”*

Viñas en Flor was born in 2007. On the mythical Route 40 and at 1,700 meters above sea level, the vineyard was planted in a privileged terroir that prints in our grapes a unique and unrepeatable character that, added to the climate, allows to reflect in each wine the authentic character of our terroir.

At the beginning of the winery we planted 1,200 rose bushes that accompany the vineyards, aromatize the grapes and hills, soften the climate and the land on which we make our wines.

## Cafayate Valley

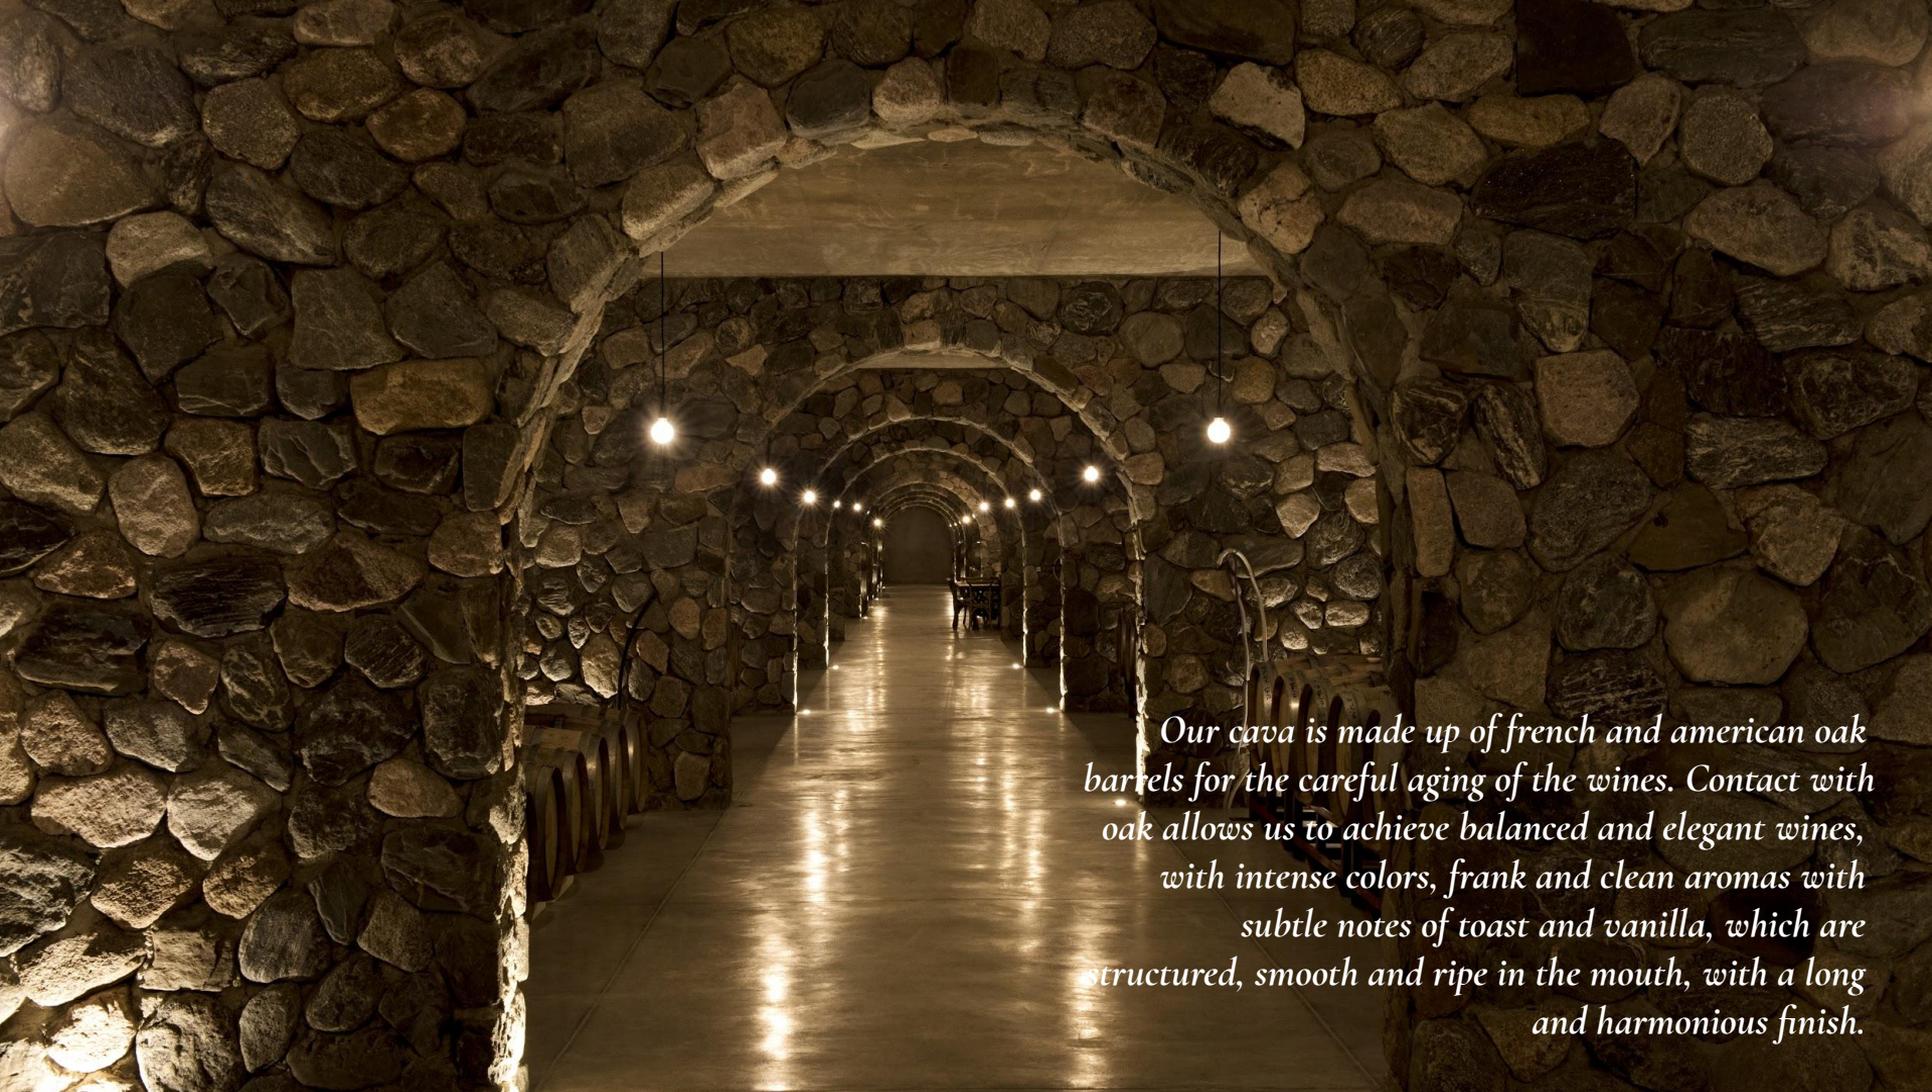

*A unique region in the world that gives our wines a unique identity.*

It is the most important producing region of Salta province, located in northwestern Argentina. The wines have a remarkable influence of terroir, strongly marked by height. The proximity with the sun, the thermal amplitude and the composition of the soil, make our wines unique and unrepeatable in the world: **terroir wines brought to their maximum expression, elegant and harmonious.**

## THE WINERY

The winery is **equipped with the latest technology**, which allows us to produce the finest wines from the vineyard. It has cement vessels and stainless steel tanks for the vinification and conservation of wines at controlled temperatures. For the harvest, it has a double selection table with destemmer (Oscillys). It has a capacity production of 1,5 millions of liters / year. In addition, it has a cold chamber and a vintage cooler, a pneumatic press with a modern drainage system and a fully equipped laboratory.

*Our cava is made up of french and american oak barrels for the careful aging of the wines. Contact with oak allows us to achieve balanced and elegant wines, with intense colors, frank and clean aromas with subtle notes of toast and vanilla, which are structured, smooth and ripe in the mouth, with a long and harmonious finish.*

## THE WINEMAKER

### *José Luis Mounier*

*He is one of the most recognized winemakers in Argentina, especially for the torrontés of extreme height, of unique elegance in the Cafayate valley.*

He was born in Mendoza, but chose to settle in Cafayate. His most important wine experiences focused on France, especially in Bordeaux. He worked in the winemaking process of the Chateau Le Bon Pasteur winery in Pomerol with Michelle Roland and was the responsible technician and manager at Bodegas Etchart. He also founded Finca Las Nubes, a boutique winery that produced the first signature wines in Salta.

In 2007 he joined Viñas en Flor project as chief of oenology

## THE WINES

### *1.700*

The iconic collection of the winery, which refers to the height where the grapes are born. It is a line of balanced, elegant, seductive, structured and mature wines, with intense colors and fresh and clean aromas. Composed of: Cabernet Sauvignon Reserve, Malbec Reserve, Cabernet Sauvignon, Malbec, Rosé, Torrontés, and Tannat.

### *RN40*

A line of young wines, made with grapes from the Cafayate Valley, where they reach their greatest varietal expression. Expressive and elegant aroma, freshness and harmony in the mouth, with a balanced and persistent finish. Integrated by a Malbec and a Torrontés.

1.700

*Reserva  
Cabernet  
Sauvignon*
